I. DISCUSSION

PURPOSE AND SCOPE:

The purpose of this report is to publish the results of hydrology and hydraulic computer analysis for the proposed Tentative Parcel Map for Pizzuto Property - County of San Diego TPM 20846. The proposed project is a 41.1-acre site and is proposed to be subdivided into 3 residential lots. The scope is to study the existing and proposed hydrology and hydraulics as it influences the surrounding properties during a 100-year frequency storm event.

PROJECT DESCRIPTION:

Pizzuto Property is located on Clayton Place, approximately 1600 feet north of the intersection between Deer Spring Place and Deer Spring Road. The nearest major road are Deer Spring Road and Highway 15. This 41.1 acres property is surrounded mostly by undeveloped land and rural used land. The site is steeply sloped and currently undeveloped.

The project proposes the subdividing the site into 3 residential lots, with each lot no less than 4 acres in size. The project proposes the grading of pads, driveways, and the improvement of Clayton Place and Deer Spring Place. In general, the pads will be graded on top of the topography and the pads will be drained away from the pads and the runoff released into the existing drainage courses. There is an existing 18-inch culvert on Clayton Place (Node 3), just after the Deer Spring Place transition. This culvert is currently under sized and will be replaced with a proposed 24-inch pipe during the improvement of Clayton Place. The runoff that enters onto Deer Spring Place (Basin 5) is conveyed to the intersection of Deer Spring Place and Deer Spring Road via existing brow ditch along the easterly side of Deer Spring Place. The existing brow ditch will be replaced by the proposed curb and gutter when Deer Spring Place is improved. Because the elongation of the time of concentration due to the flattening of the terrain for the building pads, the increase in the peak runoff due to this development is minimum (0.2 c.f.s. per acre in the worst case, for 4.2 acre basin). Since this project is still in the tentative map stage, no actual storm drain facilities have been design. Final placement and sizing of the storm drain facilities will be designed during the final engineering stage. No runoff will be released from this project that will cause harm to lives or properties. Runoff will be released into existing terrain below erosive velocity.

Due to the steepness of the existing terrain, erosion is always a concern. Currently, asphalt check dams are placed on the northern portion of Clayton Place. In the developed condition, the slopes will be landscaped and protected by brow ditches. The existing culvert will be redesigned so that the runoff will be released into the exist drainage course below the erosive velocity.

STUDY METHOD:

The method of analysis was based on the Rational Method according to the San Diego County Hydrology Manual. The Hydrology and Hydraulic Analysis were done on HydroSoft by Advanced Engineering Software.

Drainage basin areas were determined from the proposed grades shown on the Tentative Map for Pizzuto Property and 200-scale existing topographic maps from the County of San Diego.

The Rational Method provided the following variable coefficients:

Soil group C will be used for a composite runoff coefficient for the existing and proposed hydrology analyses.

The runoff coefficient for:

Existing Condition = Undisturbed Natural terrain = 0.30

Proposed Condition = Low Density Residential (1 DU/A or less) = 0.36

Rainfall Intensity = $I = 7.44 \times (P6) \times (Tc)^{0.645}$

P6 for 100 year storm = 3.5

See Table 1.1 below comparison of existing and proposed storm drain flows.

Table 1.1 - Comparison of Existing and Proposed Storm Drain Flows

Basin	Existing (cfs/ac)	Proposed (cfs/ac)
1 & 2	62.4/34.7	65.8/37.2
3	33.7/18.4	32.6/18.4
4	7.2/3.6	7.1/3.6
5	7.3/4.2	8.1/4.2

CONCLUSION:

The development of Pizzuto Property will disturbed approximately 3 acres of land or 10% of the total site. This project will change the land use from Natural Terrain to Low Density Residential-(1 du/a or less). Because this development proposes the flattening of the topography for the building pads, the time of concentration is elongated and the result is minimal increases in the peak runoff.

It was brought to our attention during the planning stage that this development have increased the peak runoff from Basin 1 & 2, (the peak runoff rate of 3.6 cfs for 34.7 acre

basin). However, with the new design, RPL #3, the time of concentration is prolonged and the peak runoff rate for Basin 1&2 has been reduced to the existing condition. Furthermore, from a field visit, the downstream channel that receives the runoff from node 14 (Basin 1 &2) is no less than 15 foot wide at its base. If there was an increase of 3.6 cfs than the water surface level would have been raised by approximately 0.2 feet.

Since, this project is still in it's tentative stage, no actual storm drain structure is being design at this point. Storm drain structure will be designed and sized during the final engineering stage. However, no runoff will be released from this project that will cause harm to lives or properties. Runoff will be released into the existing terrain through rip rap energy dissipaters at or below the erosive velocity (6 fps). Furthermore, on the steep sloping street, chevrons will be constructed at a interval that will reduce the quantity and the velocity of the runoff so that the runoff can be released safely into the natural ground.

DECLARATION OF RESPONSIBLE CHARGE

I hereby declare that I am the Engineer of Work for this project, that I have exercised responsible charge over the design of the project as defined in section 6703 of the business and professions code, and that the design is consistent with current standards.

I understand that the check of project drawings and specifications by the County of San Diego is confined to a review only and does not relieve me, as Engineer of Work, of my responsibilities for project design.

Ronald L. Holloway R.C.E. 29271 Date

LEGAL DESCRIPTION

THE SOUTHWEST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 24, TOWNSHIP 11 SOUTH, RANGE 3 WEST, SAN BERNARDINO MERIDIAN, IN THE COUNTY OF SAN DIEGO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT OF SAID LAND FILED IN THE DISTRICT LAND OFFICE, APRIL 24, 1886.

SOLAR ACCESS STATEMENT

THIS IS A SOLAR SUBDIVISION AS REQUIRED BY SECTION 81.401 (n) OF THE SUBDIVISION ORDINANCE. ALL LOTS HAVE AT LEAST 100 SQUARE FEET OF UNOBSTRUCTED ACCESS TO SUNLIGHT ON THE BUILDABLE PORTION OF THE LOT.

ACCESS

ACCESS IS FROM DEER SPRINGS ROAD, WHICH IS A PUBLICLY MAINTAINED ROAD, TO DEER SPRING PLACE, WHICH IS A PRIVATELY MAINTAINED ROAD, TO THE BOUNDARY OF THE SUBJECT PROPERTY.

HEALTH DEPT. CERTIFICATE

VPM 116

ALL PARCELS SHALL HAVE A LAYOUT OF THE SEWAGE DISPOSAL SYSTEM, PROPOSED STRUCTURES, CUTS AND FILLS APPROVED BY THE SAN DIEGO DEPARTMENT OF ENVIRONMENTAL HEALTH PRIOR TO THE APPROVAL OF THE BUILDING PERMIT AND/OR ISSUANCE OF A SEPTIC TANK PERMIT. AN ADDITIONAL EXPANSION AREA OF 100% OF THE INITIAL TILE AREA SHALL BE PROVIDED BY GRAVITY FLOW FOR THE POTENTIAL EXPANSION IN THE EVENT OF FAILURE.

THIS CERTIFICATION DOES NOT IMPLY ALL CONDITIONS PURSUANT TO THE RESOURCE PROTECTION ORDINANCE AND THE GROUNDWATER ORDINANCE HAVE BEEN MET. THE DEPARTMENT OF PLANNING AND LAND USE SHOULD BE CONSULTED REGARDING THE APPLICATION OF THESE ORDINANCES RELATIVE TO THIS PROJECT. ANY RESULTANT CHANGES TO THE SEPTIC SYSTEM DESIGN(S) MUST BE RE-EVALUATED BY THE DEPARTMENT OF ENVIRONMENTAL HEALTH.

EACH PARCEL IS APPROVED FOR A STANDARD SEPTIC TANK CONNECTED TO FEET OF TILE DRAIN FIELD TO SERVE A THREE BEDROOM DWELLING: PROVIDED THE ORIGINAL SOIL IS NOT DISTURBED IN ANY WAY, SUCH AS CUTTING, FILLING OR RIPPING. THIS DOES NOT CONSTITUTE APPROVAL FOR COMMERCIAL ESTABLISHMENTS.

2	240	3	1
3	480	3 & 5	1 & 3

GARY ERBECK, DIRECTOR DEPARTMENT OF ENVIRONMENTAL HEALTH
BY: PAUL NICHOLS REHS DATE: 06-08-2004

NOTE: PARCELS 1 AND 2 HAVE LAYOUT APPROVAL FOR 5 BEDROOM. PARCEL 3 HAS LAYOUT APPROVED FOR 4 BEDROOM AND THE SYSTEM IS A COMBINATION OF 3 FOOT TRENCH AND 5 FOOT TRENCH (STEEP SLOPE)

EASEMENT NOTES

- AN EASEMENT TO THE SAN DIEGO COUNTY WATER AUTHORITY FOR PIPELINE PURPOSES DATED: MAY 27, 1964 AS FP NO. 1964-95321 OF O.R.
- AN EASEMENT FOR A PIPELINE DATED: DECEMBER 14, 1965 AS FP NO. 1965-225593 OF O.R.
- AN EASEMENT FOR ROAD AND UTILITY PURPOSES DATED: DECEMBER 23, 1968 AS FP NO. 1968-224362 OF O.R.
- AN EASEMENT TO SAN DIEGO GAS & ELECTRIC FOR UTILITY PURPOSES DATED: FEBRUARY 3, 1975 AS FILE NO. 1975-024453 OF O.R.
- AN EASEMENT TO SAN DIEGO GAS & ELECTRIC FOR UTILITY PURPOSES DATED: NOVEMBER 25, 1975 AS FP NO. 1975-331281 OF O.R.
- AN EASEMENT TO THE SAN MARCOS COUNTY WATER DISTRICT FOR PIPELINE PURPOSES DATED: APRIL 19, 1979 AS FP NO. 1979-160549 OF O.R.
- AN EASEMENT TO SAN DIEGO GAS & ELECTRIC FOR UTILITY PURPOSES DATED: AUGUST 22, 1979 AS FP NO. 1979-352033 OF O.R.
- AN EASEMENT TO PACIFIC TELEPHONE AND TELEGRAPH COMPANY FOR UTILITY PURPOSES DATED: NOVEMBER 16, 1979 AS FP NO. 1979-485747 OF O.R.
- AN EASEMENT TO THE SAN MARCOS COUNTY WATER DISTRICT FOR PIPELINE PURPOSES DATED: SEPTEMBER 5, 1985 AS FP NO. 1985-325569 OF O.R.
- AN EASEMENT TO SAN MARCOS COUNTY WATER DISTRICT FOR PIPELINE PURPOSES DATED: OCTOBER 30, 1986 AS FP NO. 1986-493245 OF O.R.

GENERAL NOTES:

- ALL INTERNAL STREETS WILL BE PRIVATE (DEER SPRINGS PLACE)
- GRADING AND IMPROVEMENTS SHALL BE IN ACCORDANCE WITH COUNTY STANDARDS.
- EASEMENTS OF RECORD NOT SHOWN HEREON SHALL BE HONORED, ABANDONED AND/OR RELOCATED TO THE SATISFACTION OF ALL INTERESTED PARTIES, AND PUBLIC UTILITY EASEMENTS NECESSARY TO SERVE THIS PROJECT WILL BE COORDINATED WITH SERVING UTILITY COMPANIES.
- LOT DIMENSIONS AND AREAS SHOWN HEREON ARE APPROXIMATE. THE DIMENSIONS MAY BE ADJUSTED TO BE CONSISTENT WITH THE FINAL MAP.
- ZONING REQUIREMENTS:

USE REGULATIONS: A70
NEIGHBORHOOD REGS -
ANIMAL REGS L

DENSITY .25
LOT SIZE (AC) 4 ACRES

FIRE: DEER SPRINGS FIRE PROTECTION DISTRICT
TELEPHONE: AT&T
GAS & ELECTRIC: SAN DIEGO GAS & ELECTRIC CO.
STREET LIGHTING: NO STREET LIGHTS ARE PROPOSED

6. OPEN SPACE (STEEP SLOPES)

PARCEL 1 = 7.81 ACRES
PARCEL 2 = 2.89 ACRES
PARCEL 3 = 8.42 ACRES
TOTAL = 19.12

7. "THIS PLAN IS PROVIDED TO ALLOW FOR FULL ADEQUATE DISCRETIONARY REVIEW OF A PROPOSED DEVELOPMENT PROJECT. THE PROPERTY OWNER ACKNOWLEDGES THAT ACCEPTANCE OR APPROVAL OF THIS PLAN DOES NOT CONSTITUTE AN APPROVAL TO PERFORM ANY GRADING SHOWN HEREON, AND AGREES TO OBTAIN VALID GRADING PERMISSIONS BEFORE COMMENCING SUCH ACTIVITY."

OWNER/SUBDIVIDER:

WE HEREBY CERTIFY THAT WE ARE THE RECORD OWNERS, AS SHOWN ON THE LATEST EQUALIZED COUNTY ASSESSMENT, OF THE PROPERTY SHOWN ON THE TENTATIVE PARCEL MAP. ALL OF OUR CONTIGUOUS OWNERSHIP WITHIN AND BEYOND THE BOUNDARIES OF THE TENTATIVE PARCEL MAP ARE SHOWN. THE BASIS OF CREATION OF THE LOTS IN OUR OWNERSHIP (E.G. PARCEL MAP, FINAL MAP, CERTIFICATE OF COMPLIANCE, RECORDED DEED BEFORE 2/1/72) IS INDICATED ON THE TENTATIVE PARCEL MAP. WE UNDERSTAND THAT PROPERTY IS CONSIDERED AS CONTIGUOUS EVEN IF IT IS SEPARATED BY ROADS, STREETS, UTILITY EASEMENTS OR RAILROAD RIGHT-OF-WAY. "FREeway" AS DEFINED IN SECTION 23.5 OF THE STREETS AND HIGHWAY CODE, SHALL NOT BE CONSIDERED AS ROADS OR STREETS.

WE FURTHER CERTIFY THAT WE WILL NOT, BY THIS APPLICATION, CREATE OR CAUSE TO BE CREATED, OR WILL NOT HAVE PARTICIPATED IN THE CREATION OF MORE THAN FOUR PARCELS ON CONTIGUOUS PROPERTY UNLESS SUCH CONTIGUOUS PARCELS WERE CREATED BY MAJOR SUBDIVISION. FOR PURPOSES OF THIS CERTIFICATION, THE TERM "PARTICIPATED" MEANS HAVING COOPERATED WITH OR ACTED IN A PLANNING, COORDINATING OR DECISION-MAKING CAPACITY IN ANY FORMAL OR INFORMAL ASSOCIATION OR PARTNERSHIP FOR THE PURPOSE OF DIVIDING REAL PROPERTY.

LEGAL DESCRIPTION

THE SOUTHWEST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 24, TOWNSHIP 11 SOUTH, RANGE 3 WEST, SAN BERNARDINO MERIDIAN, IN THE COUNTY OF SAN DIEGO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT OF SAID LAND FILED IN THE DISTRICT LAND OFFICE, APRIL 24, 1886.

SOLAR ACCESS STATEMENT

THIS IS A SOLAR SUBDIVISION AS REQUIRED BY SECTION 81.401 (n) OF THE SUBDIVISION ORDINANCE. ALL LOTS HAVE AT LEAST 100 SQUARE FEET OF UNOBSTRUCTED ACCESS TO SUNLIGHT ON THE BUILDABLE PORTION OF THE LOT.

ACCESS

ACCESS IS FROM DEER SPRINGS ROAD, WHICH IS A PUBLICLY MAINTAINED ROAD, TO DEER SPRING PLACE, WHICH IS A PRIVATELY MAINTAINED ROAD, TO THE BOUNDARY OF THE SUBJECT PROPERTY.

HEALTH DEPT. CERTIFICATE

VPM 116

ALL PARCELS SHALL HAVE A LAYOUT OF THE SEWAGE DISPOSAL SYSTEM, PROPOSED STRUCTURES, CUTS AND FILLS APPROVED BY THE SAN DIEGO DEPARTMENT OF ENVIRONMENTAL HEALTH PRIOR TO THE APPROVAL OF THE BUILDING PERMIT AND/OR ISSUANCE OF A SEPTIC TANK PERMIT. AN ADDITIONAL EXPANSION AREA OF 100% OF THE INITIAL TILE AREA SHALL BE PROVIDED BY GRAVITY FLOW FOR THE POTENTIAL EXPANSION IN THE EVENT OF FAILURE.

THIS CERTIFICATION DOES NOT IMPLY ALL CONDITIONS PURSUANT TO THE RESOURCE PROTECTION ORDINANCE AND THE GROUNDWATER ORDINANCE HAVE BEEN MET. THE DEPARTMENT OF PLANNING AND LAND USE SHOULD BE CONSULTED REGARDING THE APPLICATION OF THESE ORDINANCES RELATIVE TO THIS PROJECT. ANY RESULTANT CHANGES TO THE SEPTIC SYSTEM DESIGN(S) MUST BE RE-EVALUATED BY THE DEPARTMENT OF ENVIRONMENTAL HEALTH.

EACH PARCEL IS APPROVED FOR A STANDARD SEPTIC TANK CONNECTED TO * FEET OF TILE DRAIN FIELD TO SERVE A THREE BEDROOM DWELLING: PROVIDED THE ORIGINAL SOIL IS NOT DISTURBED IN ANY WAY, SUCH AS CUTTING, FILLING OR RIPPING. THIS DOES NOT CONSTITUTE APPROVAL FOR COMMERCIAL ESTABLISHMENTS.

SHEET 1 OF 1

IV. REFERENCES

Directions for Application:

- (1) From precipitation maps determine 6 hr and 24 hr amounts for the selected frequency. These maps are included in the County Hydrology Manual (10, 50, and 100 yr maps included in the Design and Procedure Manual).
- (2) Adjust 6 hr precipitation (if necessary) so that it is within the range of 45% to 65% of the 24 hr precipitation (not applicable to Desert).
- (3) Plot 6 hr precipitation on the right side of the chart.
- (4) Draw a line through the point parallel to the plotted lines.
- (5) This line is the intensity-duration curve for the location being analyzed.

Application Form:

- Selected frequency 100 year
- $P_6 = \underline{3.5}$ in., $P_{24} = \underline{6.7}$, $\frac{P_6}{P_{24}} = \underline{52\%}$ (2)
- Adjusted $P_6^{(2)} = \underline{3.5}$ in.
- $t_x = \underline{\hspace{1cm}}$ min.
- $I = \underline{\hspace{1cm}}$ in./hr.

Note: This chart replaces the Intensity-Duration-Frequency curves used since 1965.

*The values associated with 0% impervious may be used for direct calculation of the runoff coefficient as described in Section 3.1.2 (representing the pervious runoff coefficient, Cp, for the soil type), or for areas that will remain undisturbed in perpetuity. Justification must be given that the area will remain natural forever (e.g., the area is located in Cleveland National Forest).

FIGURE

Rational Formula - Overland Time of Flow Nomograph

Note that the Initial Time of Concentration should be reflective of the general land-use at the upstream end of a drainage basin. A single lot with an area of two or less acres does not have a significant effect where the drainage basin area is 20 to 600 acres.

Table 3-2 provides limits of the length (Maximum Length (L_M)) of sheet flow to be used in hydrology studies. Initial T_i values based on average C values for the Land Use Element are also included. These values can be used in planning and design applications as described below. Exceptions may be approved by the "Regulating Agency" when submitted with a detailed study.

Table 3-2
